

COMPOUND BRISAL OX Instructions

GENERAL REMARKS

Brisal paste is a product which allows good electrical connections while assuring a corrosion protection.

This compound is delivered in 200g boxes under reference 50.855 and looks as a thick grey paste.

STORING AND USE-BY DATE

Storing : The Brisal OX paste has to be kept away from heat.

Use by date: 5 years after manufacture date

The product must be used in the two-years period after box opening.

Close the box hermetically after use in order to maintain the product out of dampness.

APPLICATION FIELD

The compound 50-855 is used in case of metalization on aluminium alloys because it has the particularity of crushing the alumina sheet under tightening or crimping. It is also recommended for any other metal.

USE INSTRUCTIONS

Homogenize the product to use it with a spatula.

Strip the part to be connected with a brush (**Do not use abrasive paper**).

Clean the surface with a fat-away solvent.

Then apply the compound 50-855 with a spatula.

NOTA :

After linking up, remove every mark of excess product with a fat-away solvent. Then, varnish can protect the connection.
